What you will learn in this session

8x
growth
in last
3 years

AI is the **largest source of net-new data** being generated.

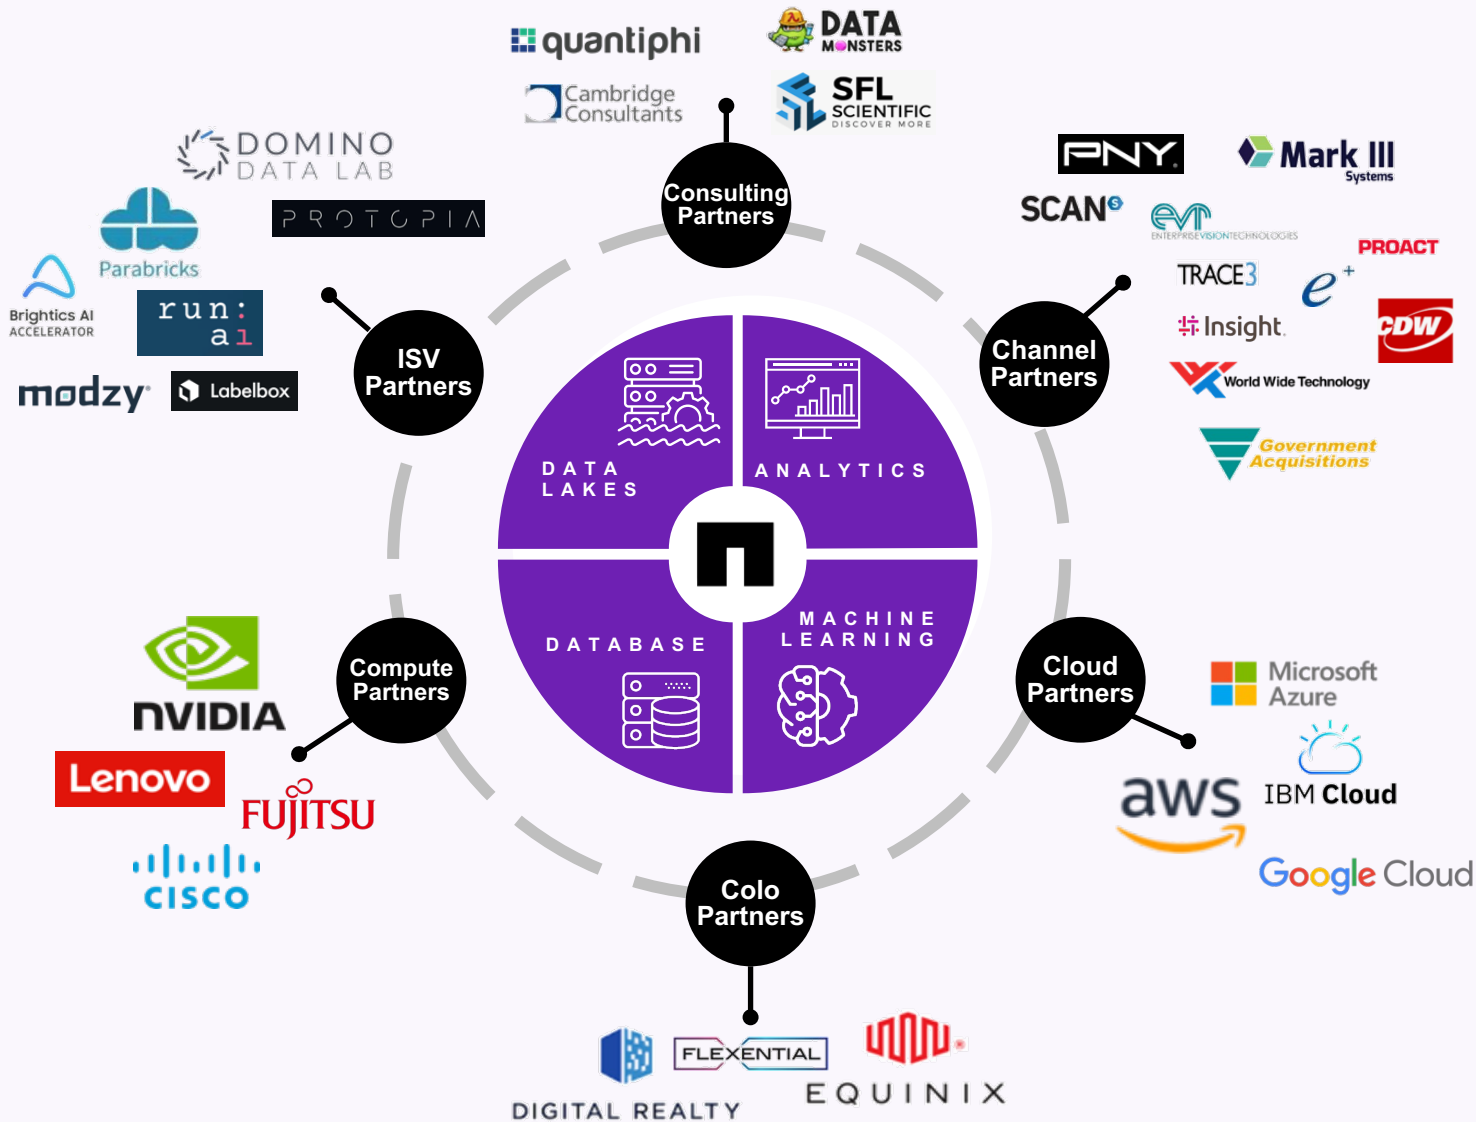

Gen AI, Data Lakes, and Analytics **projects are everywhere!**

We have a **market-leading and differentiated portfolio.**

There are **new buying personas** that you need to engage with.

We have **winning Specialist teams** to help develop and close.

... And it drives **Win in Flash**

NetApp® 

Leverage a massive AI ecosystem with customer data on NetApp at the center of it all

AI Headlines

- Gen AI models running **5X** the competition

- Retail, Drug Discovery, and Public sector seeing **success**

- **80% +** market share

- NetApp partnering with NVIDIA are helping Pong Yuen use AI to **simulate large fire accidents**. They are using machine learning for both intelligent fire detection and evacuation as well as construction risk management.

- Yale School of Medicine is using the NetApp AI solution to help adapt changing analytical needs, such as the rapid shift from human genomics to **COVID-19 analytics**.

- By using the NetApp solution Trident CyberAgent doesn't have to worry about storage and focus on **improving the usability** of their AI platform.

Success in AI is rewarding

7x

companies that succeed at AI will be fastest-growing
(Forrester)

\$16T

in business value by 2030
(PwC)

76%

of executives acknowledge that they **struggle to scale AI successfully**

(Deloitte, PwC)

18%

of companies have **implemented multiple enterprise AI projects**

Why partner with NetApp AI

2022 • Frost & Sullivan Best Practices Award, **North American AI Healthcare Solutions Enabling Technology Leadership**

• **Best Overall Computer Vision Solution** from AI Breakthrough Awards

• **AI Excellence Award for Natural Language Processing (NLP)** from Business Intelligence Group

2021 • **Stratus Award for Top Products/Services** from Business Intelligence Group

2020 • **Best Machine Learning Platform** from AI Breakthrough Awards

2019 • AI Breakthrough Award winner for **Best AI Solution for Big Data**

- Alconics winner for:
 - **Corporate Innovation in AI**
 - **Best Application of AI in Healthcare** (runner-up)

**How
BUSINESS
LEADERS
see AI**

D A T A

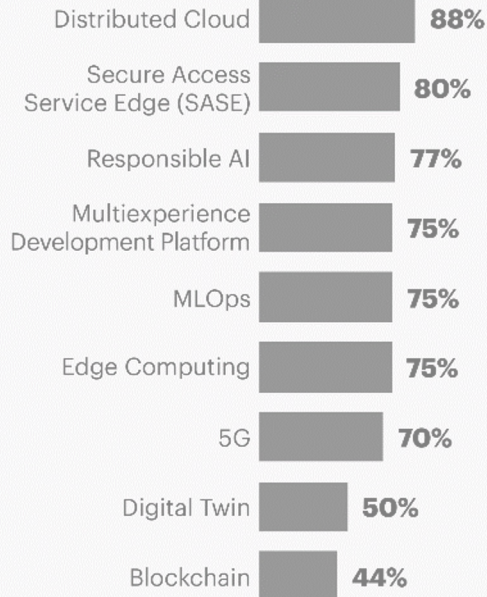

V A L U E

AI is where customers are spending money...

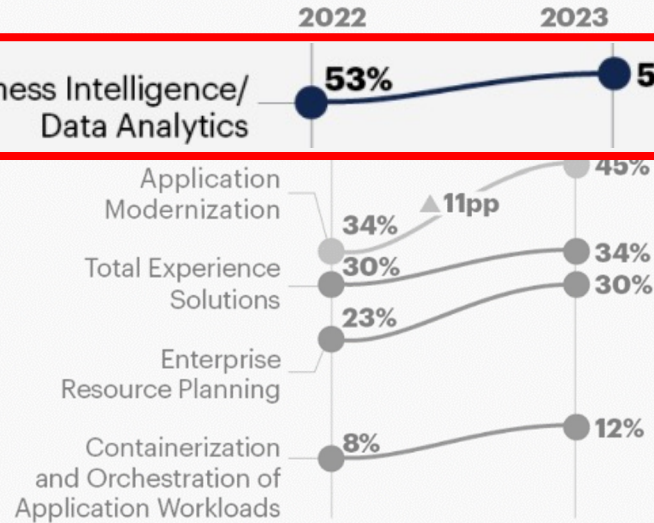

Which technologies are most likely to be implemented by 2025?

Artificial Intelligence/
Machine Learning (AI/ML) **92%**

For which technologies will more CIOs increase funding in 2023 compared to 2022?

Business Intelligence/
Data Analytics **53%** (2022) to **56%** (2023)

>50% of Execs expect AI use will be widespread or critical to core business functions by 2025

Why customers turn to NetApp AI for data services

BEFORE NETAPP	AS-IS → TO-BE		AFTER NETAPP
Bottlenecked data pipeline			Free-flowing data pipeline
Process-driven Speed			Intelligence-driven speed
Slow, oversized dataset copies			Fast, efficient dataset copies
Basic storage capabilities			Advanced storage capabilities
Stuck on the starting block			Hit the ground running

Building the industry's most integrated data ecosystem for AI

NetApp AI verified with AFF C-Series systems

AFF C-Series now included in NetApp's AI-proven architecture powered by NVIDIA DGX

Eliminate the design complexity and guesswork from AI solutions and go from deployment to discovery in days, not months and **now do so for less**

- AFF C-Series added to NetApp's AI ecosystem lowering entry costs with only nominal change in performance
- Provides flash-driven data pipelines from edge to core to cloud, ideally suited for lighter or secondary AI/ML workloads
- Use the optional NVIDIA AI Platform Software or NetApp BlueXP to monitor and control the data environment on-site and in multiple clouds

NetApp AI VERIFIED FOR C-SERIES SYSTEMS

NetApp AI verified with AFF C-Series systems

AFF C-Series now included in NetApp's AI-proven architecture powered by NVIDIA GPUs in CISCO UCS Compute nodes.

Eliminate the design complexity and guesswork from AI solutions and go from deployment to discovery in days, not months and **now do so for less**

- AFF C-Series added to NetApp's FlexPod AI ecosystem lowering entry costs with only nominal change in performance
- Provides flash-driven data pipelines from edge to core to cloud, ideally suited for lighter or secondary AI/ML workloads
- Use the optional NVIDIA AI Platform Software or NetApp BlueXP to monitor and control the data environment on-site and in multiple clouds

FlexPod AI VERIFIED FOR C-SERIES SYSTEMS

Pause For Questions

The AI Buyer

NetApp AI buyer attributes

AI Buyers – Data Scientist, Line-of-Business

- AI journey started in the Cloud, now needs **Hybrid or On Prem strategy**
- Data Scientist **productivity** is key to productize AI models
- Data **locality, accessibility, and availability**
- Actively optimizing **time to production, productivity**
- Care about **Data Governance, Data Security, and Explainable AI**

Question for AI buyers

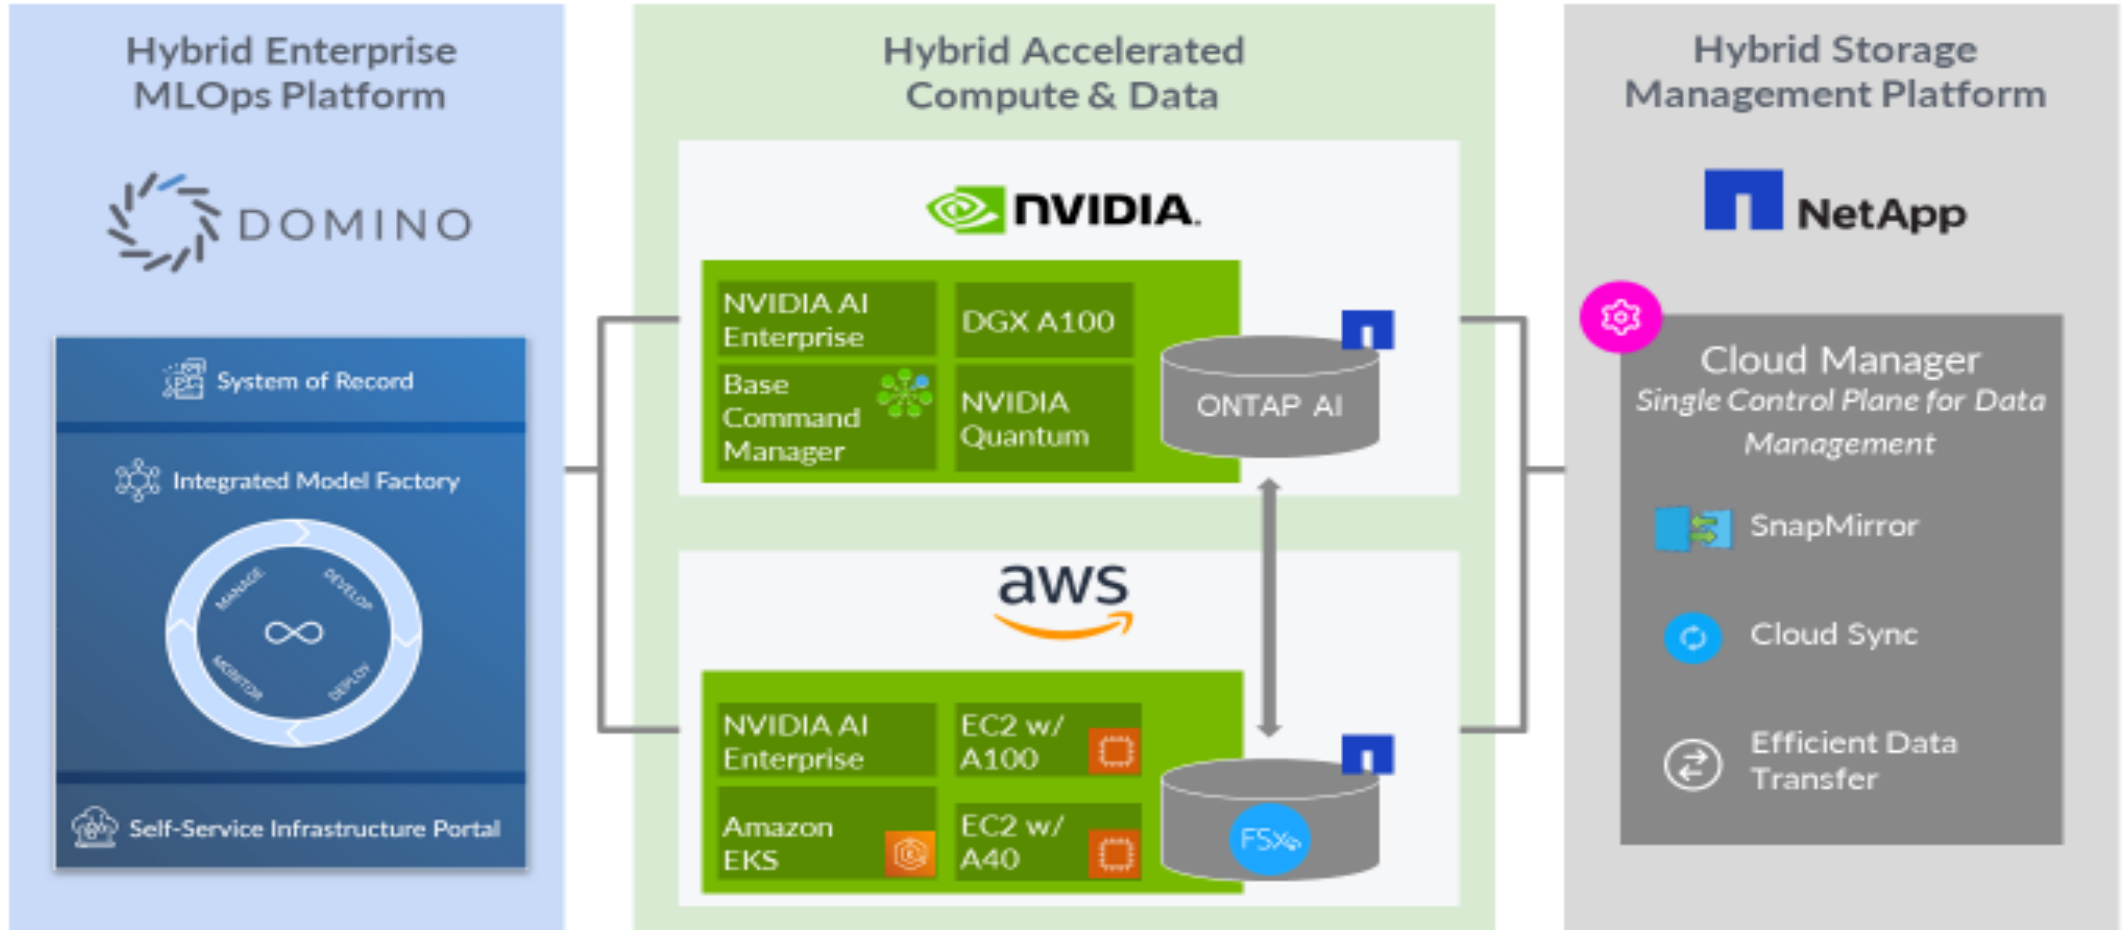

How to signal an AI opportunity

1. Do your data scientists collaborate and share data without copying large data sets?
2. How long does it take to access the rich data sets in your environment?
3. What percentage of your models make it into enterprise production?
4. Do you move model training data between clouds and on premises?
5. How are you addressing data governance, data security and Explainable AI?

Enterprise MLOps platform with NetApp AI and Domino

Integrated AI/ML Workload Solution

From Demo to POC to pilot to production, you get faster time to value

Succeed today and in the future with a consistent, transformative NetApp data experience

Accelerate AI is the **largest source of net-new data** being generated.

Simplify Gen AI, Data Lakes, and Analytics projects are **everywhere!** Complete routine tasks with ease

Flex Move to any compute and develop environment, in any combination, at any time, so no matter how requirements change, or projects mature, you're ready we have a **market-leading and differentiated portfolio.**

Scale Ensure you can scale up or down and move, however, whenever, wherever you need. There are **new buying personas** that you need to engage with. We have **winning Specialist teams** to help develop and close.

Pause For Questions

NetApp Secure Data Management for AI

The only enterprise storage vendor validated to store top-secret data

Commercial Solutions for Classified (CSfC) Component List

FIPS 140-2

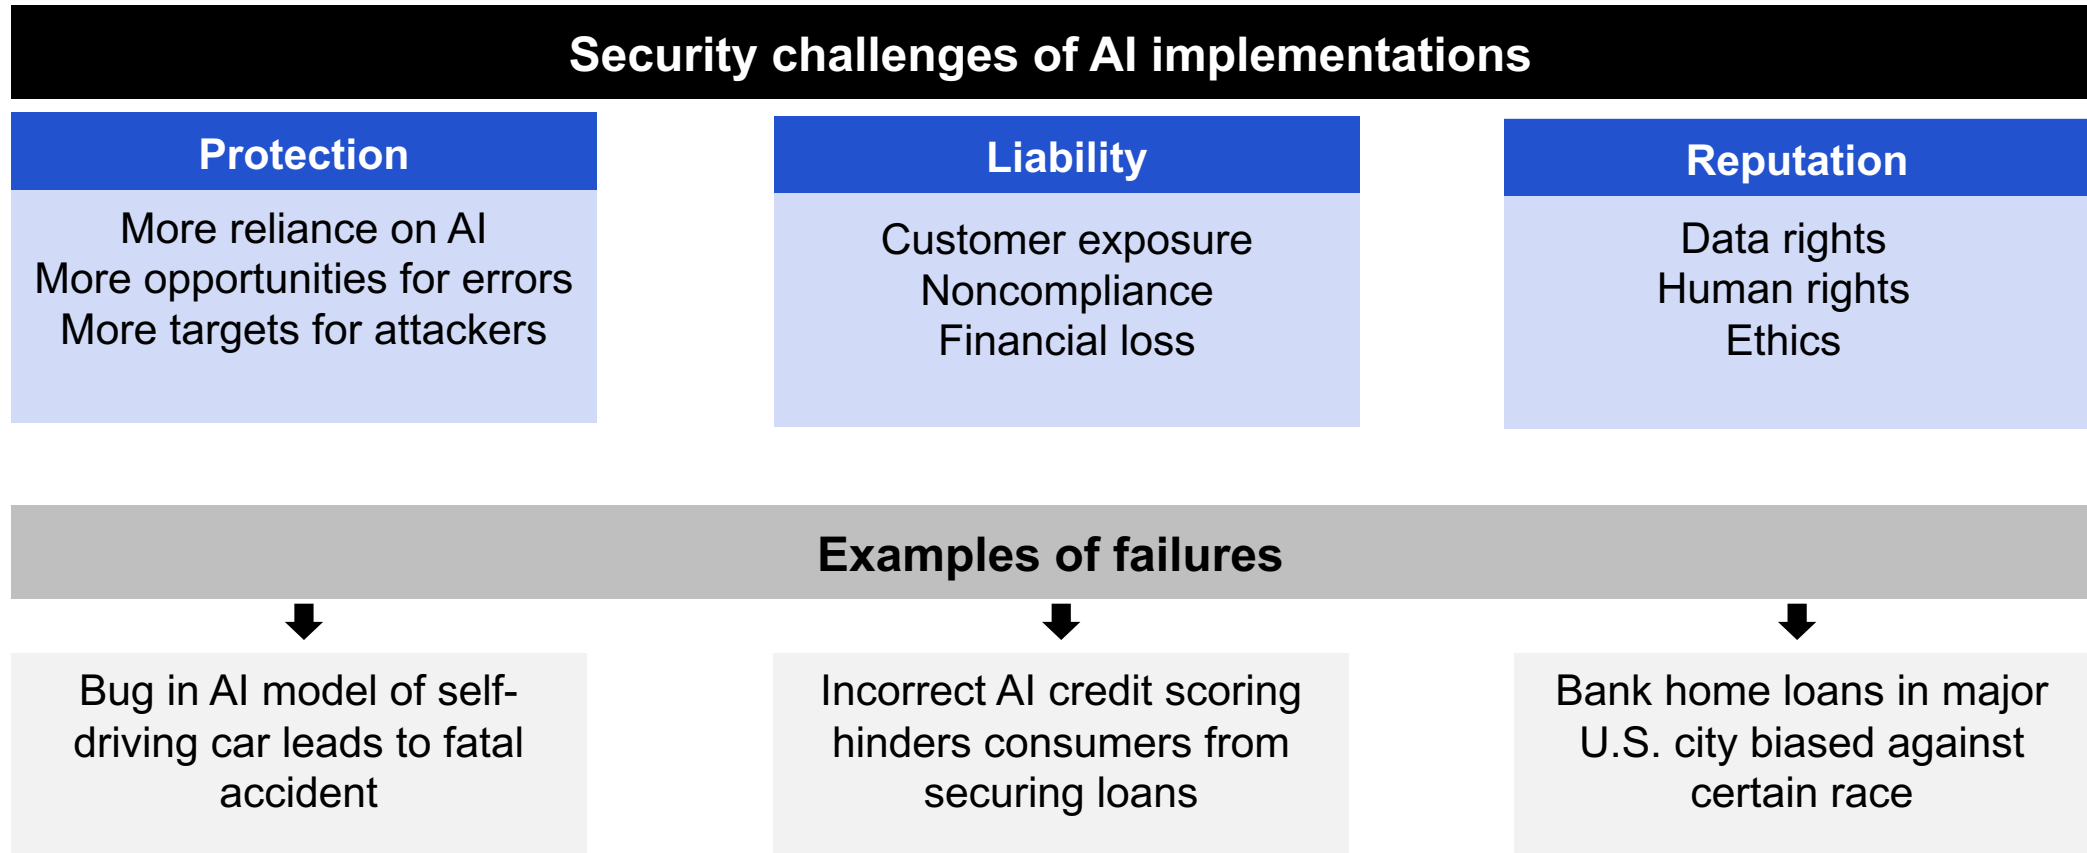

Department of Defense Approved Product List (DoDIN APL)

Common Criteria

As AI enters the enterprise, threats naturally follow

Source: Gartner 2021

Why NetApp AI? Because we enable you to...

Protect

Prevent attacks and minimize data loss or downtime.

Accelerated backup and disaster recovery

Data security and retention

Data efficiency and reuse

Detect

Proactively identify internal and external threats.

User activity anomalies

Storage behavioral abnormalities

File-extension screening

Recover

Quickly restore data and applications.

Operational recovery

Data recovery

Disaster recovery

NetApp AI cyber-resilience solutions

Ransomware protection

Prevent, detect, and rapidly recover from cyberthreats

Fast, efficient data backup and recovery

Secure logical air gap

AI/ML-driven user and storage anomaly detection

Backup and restore

Rapidly recover data after unplanned data loss and corruption

Efficient block-level backup to object

Application-consistent data protection

Secure WORM file locking with flexible retention

Disaster recovery and business continuity

Maintain data access and support worker productivity

Highly available systems

Efficient data and system mirroring

Continued workplace productivity and collaboration

Data governance and compliance

Identify data that you store and comply with retention mandates

Data classification and categorization

Regulatory reporting

Data retention and compliance

Let's see how we help companys free
data with NetApp AI and partnering with
NVIDIA

Longstanding Partnership

 **NetApp**[®]

 **nVIDIA**[®]

- Partners since 2018
- Hundreds of joint customers
- Complementary Solution offerings
- Aligned Worldwide Ecosystem partners
 - 35+ joint resellers, plus ISV, MSP, and SDP partners
- Joint solution development
 - ONTAP AI Reference Architecture
 - ONTAP AI integrated solution (Arrow, TD/S, Arrow UK)
 - DGX Cloud
 - LaunchPad (PoC environment)
 - DGX SuperPOD
 - Industry use-case-based solutions

Founded in 1993

Jensen Huang, Founder & CEO

22,500 Employees, \$1T Market Cap

\$26.9B Revenue, \$15B Data Center FY23, 41% YoY

- 3 Million developers and 8,500 startups have created thousands of GPU-based apps
- NVIDIA accelerates more than 700 applications today, including the top 15 in scientific computing
- More than 1,000,000,000 CUDA-based GPUs shipped

DGX/NVDA AI is powering:

30 of the top 30 AV Data Centers

25,000 companies' AI factories

150K Omniverse users

200M gamers and creators

400,000 developers in HC/LS

1M developers for AI at the Edge

NVIDIA's Value to NetApp

- The leader in AI infrastructure lends NetApp credibility in next generation hybrid workloads - AI, Data Lakes, Accel. Compute
- NetApp complements NVIDIA's experience with LoB and Data Scientists with our IT and Data Center expertise
- AI/Analytics is a \$10B storage market over the next 3 years, IDC

“Huang has risen to the elite among Silicon Valley’s visionary leaders and has led NVIDIA from the maker of computer graphics cards to become the premier platform for artificial intelligence and machine learning. This positions NVIDIA at the forefront as the computing industry contemplates a fundamental shift in processing. NVIDIA saw it coming.” **TECHCRUNCH**

Hannover Medical School

Business challenge

- Streamline diagnostics to be much faster and less costly
- Improve patients' quality of life

Solution

- Video

Use case

- Diagnostic imaging, Chronic Obstructive Pulmonary Disease

Why NetApp

- Run five times more data in the same time
- Provided the right balance of performance and reliability
- Improved image quality, accelerated the data pipeline

“NetApp was immensely valuable in providing performance and reliability to gain sustained flows of data.”

- Dr. Hinrich Winther, resident, Hannover Medical School

Medizinische Hochschule
Hannover

[The Hannover Medical School](#), founded in 1965, is a university medical centre in the city of Hanover, in Germany, part of a regional medical network

CyberAgent

Business challenge

- Accelerate AI development at company-wide level
- AI learning platform allowing multiple engineers to run learning tasks at the same time. It must support containers and Kubernetes

Solution

- NVIDIA A100, NetApp AFF A800, Atra Trident, Cloud Volumes ONTAP

Use case

- AI for digital advertising, predictive AI

Why NetApp

- Twice the performance at half the cost
- In addition to serving more targeted ads that generate higher revenue, the storage investments are resulting in 4x cost performance improvement.

“Using Trident enables dynamic storage provisioning from Kubernetes, so users don’t need to worry about storage, greatly improving the usability of our AI learning platform.”

- Masaya Aoyama, Infrastructure Engineer/Developer Expert, CyberAgent

[CyberAgent](#) operates internet advertising agency, foreign exchange trading website, and creates PC and mobile contents such as advertisements and games. CyberAgent invests in companies with internet related business

Cambridge Consultants

Business challenge

- Get ahead of the trends in AI
- Require extreme performance for cutting edge innovation and modeling

Solution

- ONTAP® AI, 1 x A300, 2 x NVIDIA DGX-1, ONTAP FlexClone® and data protection features

Use case

- Advanced AI research

Why NetApp

- Cutting edge performance and ONTAP features
- Proven data management for demanding environments

“One of the key reasons our deep learning storage is based on NetApp is the positive experience we have had with the technology in the past.”

- Tim Ensor, Director of Artificial Intelligence, Cambridge Consultants

[Cambridge Consultants](#) is a global product development and technology consultancy firm providing outsourced research and development services

Questions for Data Lakes buyers

How to signal a Data Lakes and/or Analytics opportunity

- Is your data accessible for **AI Data Scientists**?
- How are you managing **data governance**?
- How do you **protect** your data from risk?
- Are you interested in **reducing your storage costs** and with **simplicity**?
- Is your data architecture **scalable** to support growth?
- Do you need to **simplify** streaming data?
- Does your data architecture support **Hybrid Cloud**?
- How are you planning to **manage** your Hadoop data going forward?
- Are applications requiring **multi-protocol data access**?

Computational Health Platform Win

DESIGN GOAL

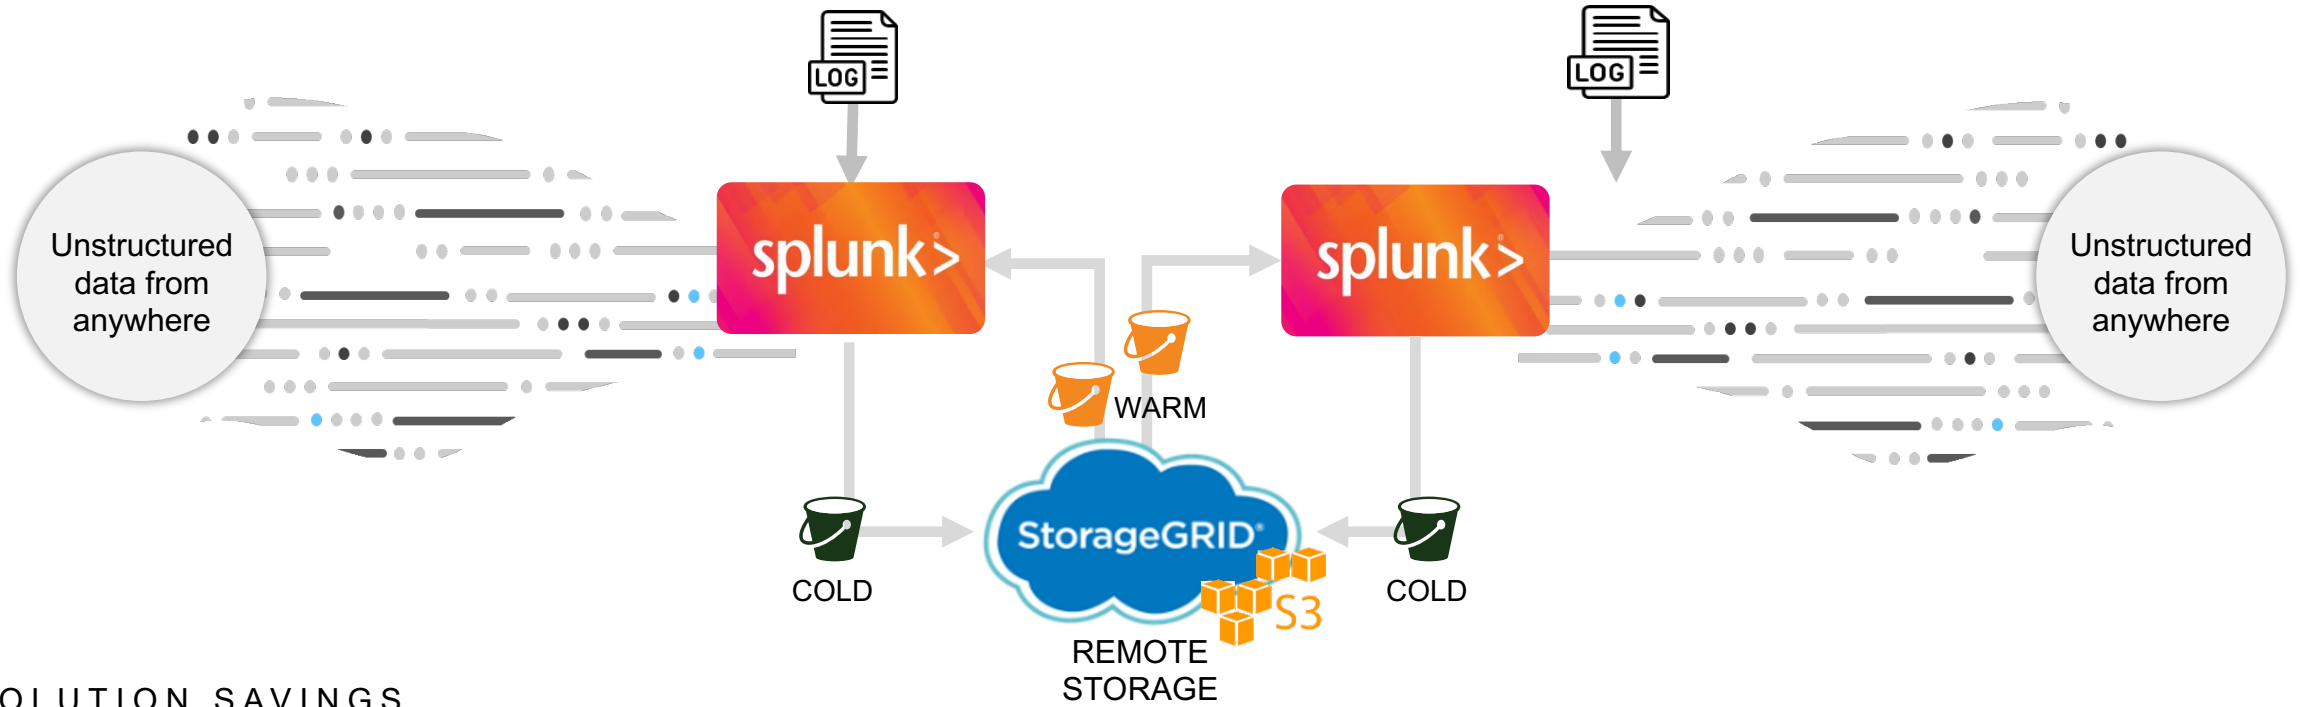

- Disaggregates storage from compute
- Reduce licensing costs for Hadoop
- Increase collaboration across teams and data scientists
- Supports Spark analytics and AI Training
- Path toward Cloud
- **Standardize security model**
- **Increase flexibility for compute**

NetApp Technologies

- FlexClones
- Snapshots
- File/Object Duality
- FabricPools
- StorageGRID ILM Engine -

NetApp AI Competencies overview

Artificial Intelligence (AI)

AI with NVIDIA DGX

Partners demonstrate expertise in the successful selling and deployment of AI and analytics solutions based on a mutual partnership with NetApp and NVIDIA.

AI with FlexPod AI

Partners demonstrate expertise in the successful selling and deployment of AI and analytics solutions with FlexPod® technology.

Analytics

Data Analytics—Splunk for Security/ITOps

Partners demonstrate expertise in the successful selling and deployment of AI and analytics solutions based on a mutual partnership with NetApp and Splunk.

Drive business with NetApp Partner Marketing campaigns

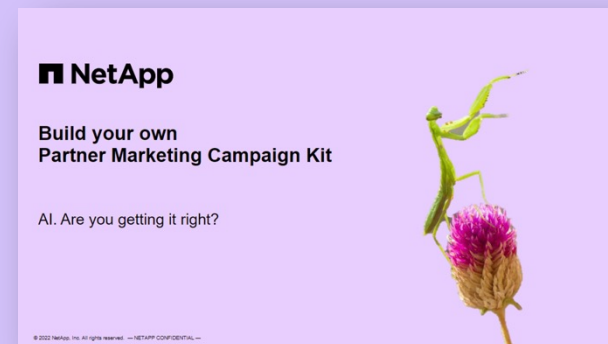

- NetApp offers you a broad variety of ready-to-go channel marketing campaign kits
- All kits are designed to easily drive demand and grow your business
- Assets include emails, social media kits, images, event-related materials, a telemarketing kit, and more
- Campaigns are available for **hybrid cloud, cloud, AI and commercial**
- **Choose your campaign**, customize to your needs then kick it off!

Competitive Battle Card: Artificial Intelligence (AI)

Executive Summary

NetApp ONTAP AI technology with solutions for NVIDIA A100 POD
 NVIDIA DGX SuperPOD with NetApp certified for success with HPC/NLP workloads
 NVIDIA AI Enterprise validated end-to-end, cloud-native AI and data analytics software suite
 NVIDIA DGX Cloud subscription-based service for AI development infrastructure
 NetApp AI solutions support AI data and workloads at the edge, core, and cloud
 NetApp DataOps Toolkit no competitor offers easy to use Python tools for storage management
 NetApp AI Control Plane no competitor offers end-to-end Kubernetes based AI workload management
 NetApp Data Fabric offers one experience across on-prem, Azure, Google Cloud & AWS
 NetApp storage portfolio supports file, block, and object data on-prem and cloud

Winning Sales Strategy

Find your account's AI personas: search for data engineer, scientist

When you find an AI project: Engage with [ng-ai-inquiry](#)

AI BDM team will help with AI Workshop, AI RFP responses, and arrange deep sessions

Convert the opportunity into a PoC and CPOC or channel partner will do testing

Lead with DataOpsToolkit for cloning a data namespace and rapid implementation of workflows with traceability and versioning

Exclusive NVIDIA offerings not available with any storage competitors

Exclusive NVIDIA and Arrow offering not available with any storage competitors

Promote customer success [AI Customer success references](#)

Reasons Why NetApp Wins

- NetApp DataOps Toolkit:** Designed for data scientist and engineers with simple to use Python functions to access advanced features without storage expertise
- NVIDIA integrated offerings:** SuperPOD, Base POD, Enterprise AI, DGX Cloud
- NetApp supports your data fabric:** Cloud bursting from on-prem to cloud or cloud to cloud while minimizing cloud operation costs (compute and data egress)
- Optimum workstreams:** ONTAP technology allows optimal performance for multiple concurrent workloads (NFS/pNFS)
- Mainstream the AI Workflow:** with excellent Ethernet bandwidth (including NVMe/TCP, NFSoRDMA), no need for InfiniBand nor parallel file system complexities.
- Powerful multi-tenancy and QoS,** run AI and enterprise workloads in the same cluster
- Protected and Compliant Data:** AI industry's most complete native set of data protection and data security features

Key NetApp Differentiation	DataOps Toolkit	nVidia integrations	Data Fabric	AI Storage Protocols	Data Pipeline	Data Protection and Security
NetApp	Yes	Several	Yes	File, Object, Block	Edge, Core, Cloud	Strong
Competition	No	Few	No	Varies	Varies	Medium to Poor
